

Terminal block substitute for TD-700T, TD-9000T and TD-SC1

28 November 2022

TEAC Corporation

Recently, a stable supply of some parts has become difficult, especially the terminal block for TD-700T, TD-9000T, and TD-SC1 have become more difficult.

So we have decided to adopt a substitute for them.

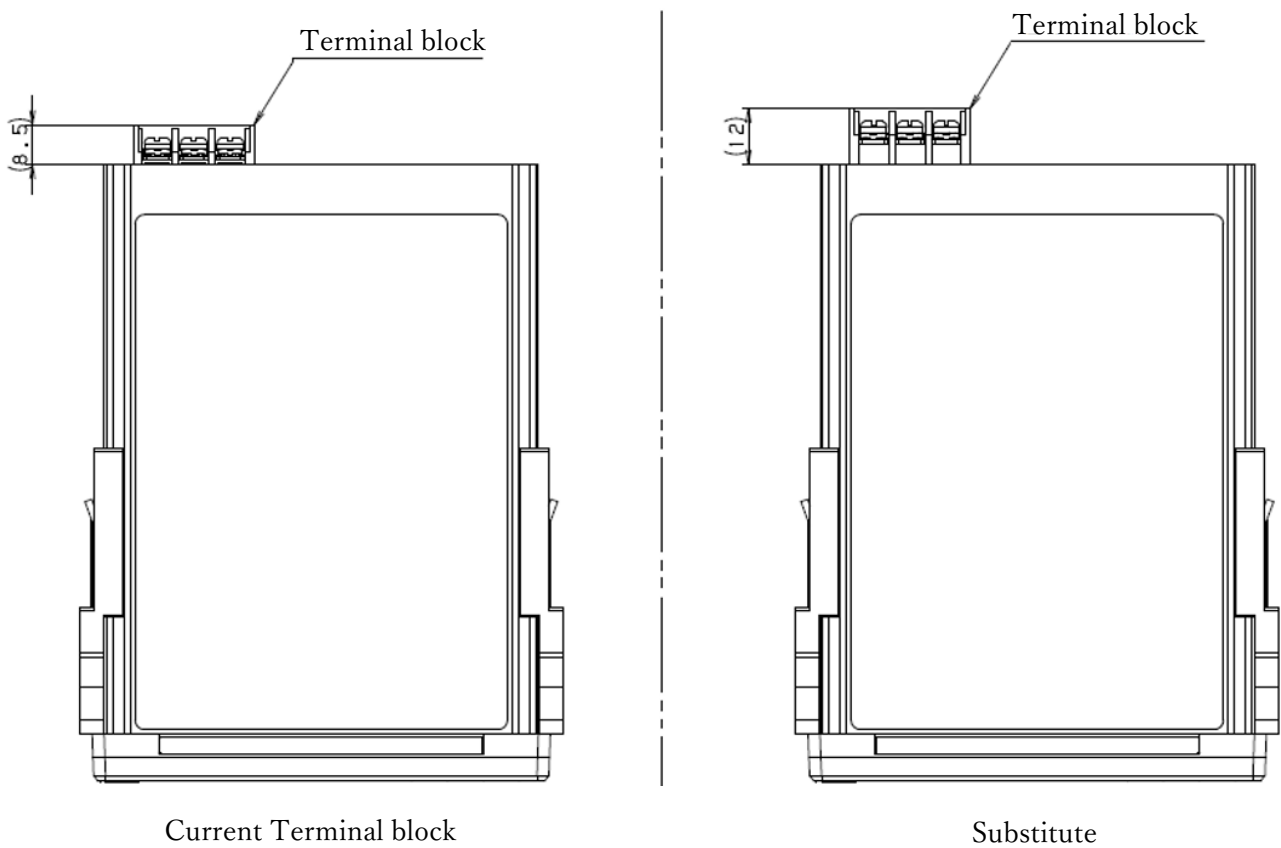

But the size of the substitute is a little bit different from the current one.

Please see the following drawings, it's 3.5mm longer in depth than the current one.

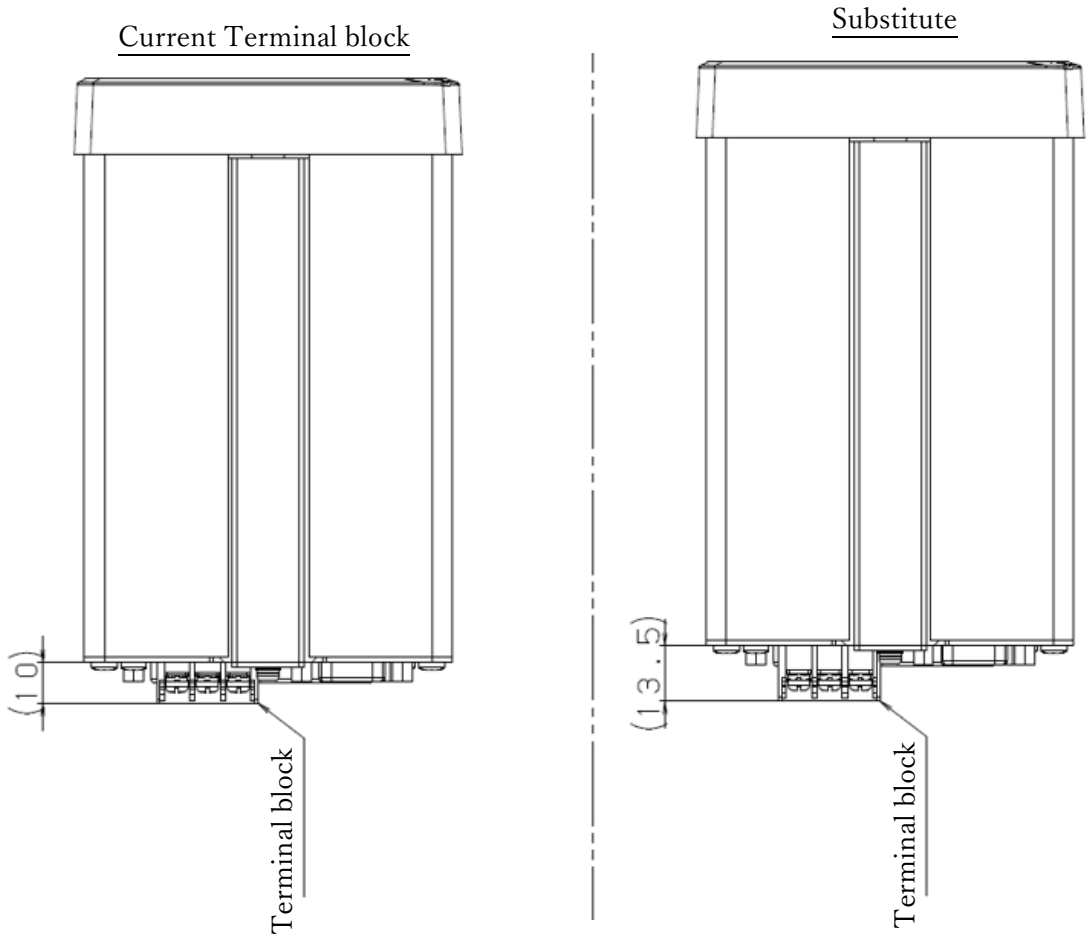

Note: Depending on the supply situation, we'll use either terminal block for production without previous notice.

We'll delete the dimensions of the terminal block on the IFU and revise it soon.

- TD-700T

- TD-9000T

-TD-SC1
